

FOR IMMEDIATE RELEASE

ISGN Hires John Axt as Title Operations Delivery Executive

Title and settlement industry veteran brings strong background in workflow and customer relationship management to customer focused title business unit

BENSALEM, PA — April 13, 2011 — ISGN, a leading provider of end-to-end technology solutions and services to the U.S. mortgage industry, has hired John Axt as title products operations and delivery executive. With a strong industry background in workflow design and customer service, Axt brings to ISGN a penchant for creating efficiencies in the production and delivery of title products and services.

ISGN provides a comprehensive portfolio of settlement services in all 50 states, and offers a full menu of title insurance, title searches and reports, including associated closing and escrow services in bundled packages. A 32-year veteran of the real estate industry, Axt comes to ISGN with 21 years of experience in the title insurance industry where he served as district manager for Stewart Title Guaranty Company. Axt also spent more than 10 years in the vendor management field with Stewart Lender Services and ABN Amro Mortgage Group.

In his career Axt has been involved in numerous initiatives in creating and designing process efficiencies in the delivery of title products. At Stewart Title he built the first customer relationship management integration, and streamlined processes through online tracking and management systems. He also designed a completely paperless title review process that leads to quicker title cycle times and greater efficiencies. And Axt led a lending industry initiative to conduct background checks of notary publics for better risk management. He put together a coalition of the largest national title agents that worked with the National Notary Association to create a program of conducting criminal background checks of notaries.

“At ISGN we’re creating a more customer focused team at our title business unit and bringing aboard industry veterans to strengthen our management team,” said Niraj Patel, group president of ISGN. “John Axt brings to ISGN strong credentials in customer relationship management in the title business where he has created efficiencies in turnaround times while maintaining the highest standards of customer satisfaction.”

About ISGN

ISGN Corporation is one of the largest providers of services and technology for the mortgage industry. An industry leader with more than 1,100 customers, including large global banks and many of the top ten lenders in the country, ISGN’s product line includes a complete range of origination and settlement services, including origination, servicing and default platforms; broker

price opinions; closing and settlement services; title, valuation and flood; as well as core servicing components and loss mitigation services.
